DCW070 120 5300lm 34W 840 I PC IP66 MS 3G1.5

APPLICATION

DCW070 Series The DCW070 Series is a cost-effective waterproof LED luminaire designed for industrial, commercial and utility applications where reliability, efficiency and competitive pricing are essential. The luminaire features a durable polycarbonate housing and diffuser, providing reliable protection against moisture, dust and mechanical impact. Designed around Zhaga-compatible components, the DCW070 combines a proven housing platform with efficient LED technology and professional luminaire assembly in Estonia. With high luminous efficiency, multiple lumen packages and optional DALI and emergency versions, the DCW070 provides a practical solution for warehouses, production areas, parking garages, workshops and technical spaces. DCW070 — efficient, reliable and affordable waterproof lighting.

Environmental data. Embedded carbon, recyclable content and sustainability ratings are provided per article where determined.
